

## Frayer Model

This is a great model to help students sort out the meaning and details of career clusters and specific jobs.

Make the activity fun by using a large piece of paper, fold it in fourths, then fold the center folded corner in about 1/3 of the way. Open and there should be a diamond shape in the center. These are “valuable” words to understand. Pictures can also be added to the shape as well as words.

Example:

Word: Write **Indiana “Hot Jobs”** or **“In-Demand Jobs”**

Using information from the *Indiana Career Ready website*, define in your own words, list examples, characteristics, and non-examples.
